CHARACTERIZATION OF OXYGEN-TERMINATED DIAMOND ELECTRODES FOR ELECTROCHEMICAL APPLICATIONS

Cuvillier Verlag Apr 2011, 2011. Taschenbuch. Book Condition: Neu. 211x147x12 mm. Neuware - The topic of this thesis is the electrochemical characterization of oxygen-terminated single-crystal- and nanocrystalline diamond electrodes. Diamond is a very attractive material for bio- and electrochemical applications due to its exceptional stability, its biocompatibility, and its electrochemical properties like wide potential window of water dissociation and low background current. Therefore, diamond electrodes can operate even in harsh environments and under strongly oxidizing conditions, where electrochemical devices based...

Reviews

Absolutely essential go through pdf. Indeed, it really is play, continue to an interesting and amazing literature. You will not truly feel monotony at at any time of your time (that's what catalogues are for concerning if you question me).

-- **Julia Mohr II**

This book is definitely not easy to get going on reading but extremely entertaining to learn. It is actually filled with knowledge and wisdom I am very easily will get a delight of reading a composed ebook.
