Not illustrated. 1902 Excerpt: . of the work in the investigation of Portland cement has been done along theoretical lines, as distinguished from similar work done by the metallurgists on steel, where the first problems attacked were strictly practical in character, and have only of late developed a phase which might be said to be strictly scientific, almost entirely freed from empiricism. The investigation of the true character of Portland cement seems to have had a great fascination for the very first observers. Since Vicat (1857) Candlot, Fuchs, Feichtinger, many experimentors have endeavored to arrive at results, which might throw light on the vexed question of the constitution of cements with but indifferent results, since most of them endeavor to make use of wet reactions. All of them found Published in advance, by permission of Edward Orton Jr., State Geologist of Ohio. that the calcareous cement compounds are extremely unstable....
