DERIVED EQUIVALENCES FOR GROUP RINGS

Springer Mai 1998, 1998. Taschenbuch. Book Condition: Neu. 235x155x14 mm. This item is printed on demand - Print on Demand Titel. Neuware - A self-contained introduction is given to J. Rickard's Morita theory for derived module categories and its recent applications in representation theory of finite groups. In particular, Broué's conjecture is discussed, giving a structural explanation for relations between the p -modular character table of a finite group and that of its ' p -local structure'. The book is addressed to researchers or graduate students and can serve as material for a seminar. It surveys the current state of the field, and it also provides a 'user's guide' to derived equivalences and tilting complexes. Results and proofs are presented in the generality needed for group theoretic applications. 246 pp. Englisch.
