SYNTHESIS AND AGGREGATION OF PEPTIDEHELICES IN ARTIFICIAL MEMBRANES

Cuvillier Verlag Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 212x149x12 mm. Neuware - The function of membrane proteins is mainly dependent on their aggregational behavior. Some are active as monomers, whereas others need to assemble into oligomeric states.(1) In this context, molecular recognition, which is realized within the membrane and in the adjacent water layer, is crucial to achieve a specific assembly. In order to establish a well defined model system to study assembly processes in membranes, a recently reported...
